

ABSTRACT OF THE DISCLOSURE

The present invention provides an ink suitable for printing with a drop-on-demand ink-jet printer, said ink comprising a colorant, a polymerized fatty acid-based polyamide and a solvent which, taken separately from the ink composition, comprises at least 20% by weight of one or more components containing a single hydroxyl, carbamide, or amide group, said components each having a total of from 5 to 11 atoms of carbon, nitrogen, and oxygen.
